

DE VRIES & ASSOCIATES (DVA) CONSULTING ENGINEERS (PTY) LTD **COMPANY PROFILE | 2024**

DVA provides specialist services by well-seasoned professional engineers acting in association to provide services covering the whole spectrum of engineering disciplines.

BACKGROUND OF DVA

DVA was founded in August 2022 by **Robert de Vries**, a seasoned Professional Civil Engineer with **over 36 years** of experience in the Civil Consulting Engineering industry in South Africa, Namibia, Mozambique, and Zambia.

While DVA was established to function primarily as an independent consulting engineering entity providing services to established consulting engineering firms, contractors and private clients, its mission extends beyond solitary operation **as it actively seeks to establish partnerships and foster networks** with proficient professional engineers to provide a broader spectrum of services.

REGISTRATION & MEMBERSHIP

Robert's credentials include registration with:

- The Engineering Council of South Africa (ECSA) under Registration No. 950010;
- The South African Institute of Civil Engineers (SAICE) under Membership No. 90359;
- Associate member of the South African Association of Arbitration.

SERVICES PROVIDED BY DVA

Robert gained his expertise whilst working for well-known Consulting Engineering Companies in South Africa, namely BKS (now known as AECOM Pty Ltd), SNA Civil and Structural Engineers (Pty) Ltd and Knight Piésold Consulting. Over the years Robert has also built up a network with like-minded professional engineers who are specialists in their fields and with whom DVA is proud to be associated with. Good relationships were also established with surveyors, suppliers, and Occupational Health and Safety and Environmental Consultants.

Functioning as an independent entity DVA offers the following specialist services to established consulting engineering firms, architects, contractors and private clients:

- Hydrology and stormwater drainage design for roads and railways;
- The design of civil engineering services;
- Conducting feasibility studies, preparing design reports, and devising stormwater management plans.
- Handling contract documentation and proficient project management.
- Overseeing construction administration, management, and monitoring.

Other services include:

- Drone photography and surveying.
- Alternative dispute resolution (ADR).

In association with specialist engineers, DVA offers the following specialist services:

- The geometric and pavement design of roads and rails;
- Bridge and waterway designs;
- The design of building structures;
- Geotechnical investigations;
- Transportation & traffic engineering studies.
